disruptivedodo.

The new SPM website, *explained*.

Goal, features, performance and next steps: a clear account of what was built and why.

PREPARED FOR	PREPARED BY	DATE	VERSION
SPM HUMAN & AI	Disruptive Dodo	27 October 2026	1.0

AT A GLANCE

A site that says one thing, *clearly*.

SPM sells something specific: dedicated human teams, accelerated by AI, that stay in place. The website was designed to make that promise easy to understand, easy to verify and easy to act on.

This report explains what was built, why each choice was made, how the site performs and what can be added next. It also lists what remains to be completed or confirmed before the site goes live.

11
pages: eight main pages and three legal pages

17
sectors presented, in a two-column list

3
real case studies, each with measured results

100
desktop score for Performance, Accessibility, Best Practices and SEO

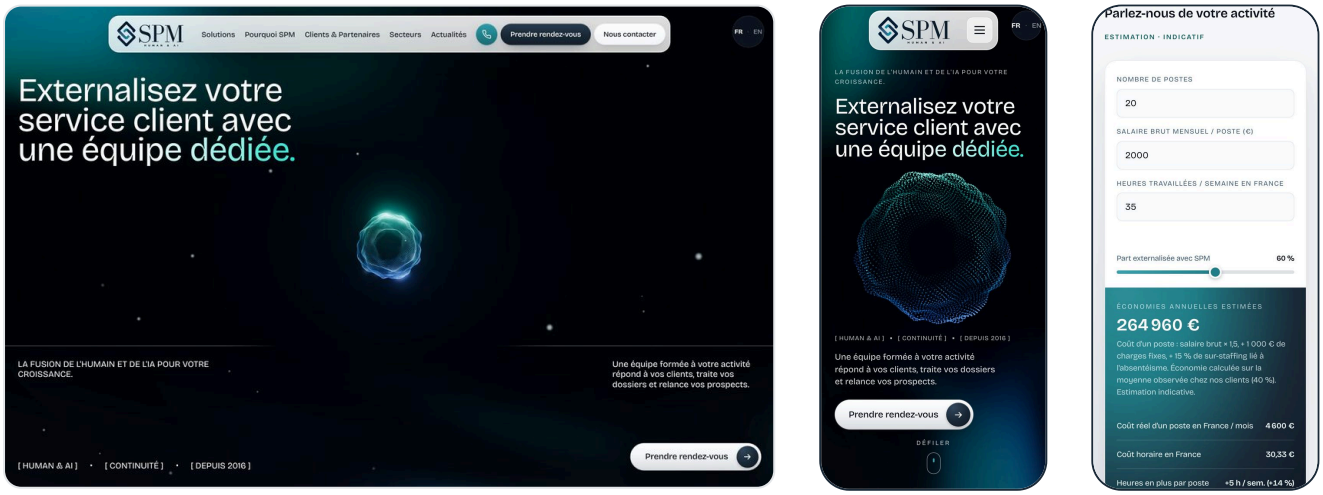

95
mobile Performance score (the other categories score 100)

0
cookies set and no third-party trackers

ON EVERY SCREEN

Homepage on desktop, and the homepage and calculator on a phone: the same site, laid out for each screen.

01 THE GOAL

From a catalogue of services to a *clear promise*.

The previous site presented four service lines over six content pages. SPM has since repositioned around one idea, **continuity**: teams that stay, made faster and more precise by AI. The new site had to carry that positioning and give visitors reasons to believe it.

01 Make the promise clear in seconds

One headline, one signature line and one main action on the first screen.

02 Prove it with facts

Figures and real case studies replace logos and adjectives.

03 Turn interest into conversations

A contact path on every page, a cost calculator and a short form.

04 Lower the fear of outsourcing

A visible method, a FAQ, sector pages and a certification in progress.

05 Attract talent as well as clients

A dedicated careers page, in its own tone of voice.

06 Be fast, accessible and findable

Performance, accessibility and search foundations built in from the start.

Two audiences

- **The European client** — a company in France or Europe that outsources part of its activity and wants continuity and quality, not just volume.
- **The Mauritian talent** — a bilingual professional looking for a career, not a stopgap job.

Three voice principles from SPM's brand book

- **Like a colleague** — plain, competent language.
- **We prove, we don't assert** — every promise rests on a figure.
- **We name the people** — the teams doing the work come first.

02 WHY IT WORKS

Every section has *a reason*.

01 A clear promise, straight away

The homepage opens with one headline, “Externalisez votre service client avec une équipe dédiée”, SPM’s signature line and one main action, “Prendre rendez-vous”. A slow-moving, AI-inspired visual replaces a stock photo.

Why it works. A visitor decides in seconds whether a page is for them. One message and one action keep that decision easy, and the visual says “AI” without the clichés the brand book asks to avoid.

02 Figures instead of logos

At SPM’s request no client is named. Proof comes from numbers: 70 client companies today, 126 supported since 2016, 500 collaborators, 12 million calls, e-mails and files a year, 97% end-customer satisfaction, 95% of calls answered. They appear on the homepage, Clients, Why SPM and the contact block.

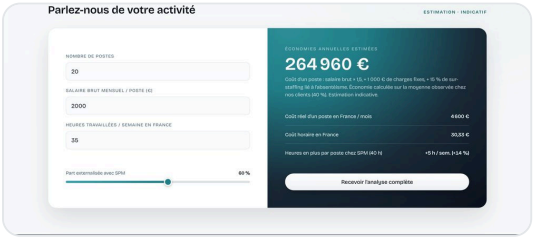

Why it works. A figure can be checked; a slogan cannot. Placing them where a visitor hesitates builds trust without exposing any client.

03 Start from the visitor’s problem

The first section after the hero names three problems: customers waiting too long, teams buried in admin, the same posts recruited again and again. Each links to the matching solution.

Why it works. Buyers look for a fix, not a catalogue. Starting from their problem shows SPM understands it, then guides them to the right page.

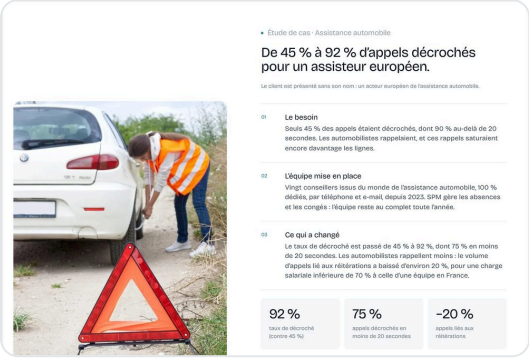

04 Let the visitor do the maths

An interactive calculator applies SPM’s own method: gross salary × 1.5, plus €1,000 fixed cost per post, plus 15% for absenteeism. It compares French and SPM working hours (35 h against 40 h) and shows an indicative annual saving based on the 40% average observed.

Why it works. It turns “outsourcing saves money” into the visitor’s own number, the most persuasive moment on the page, and leads naturally to the contact form. It is clearly labelled as indicative.

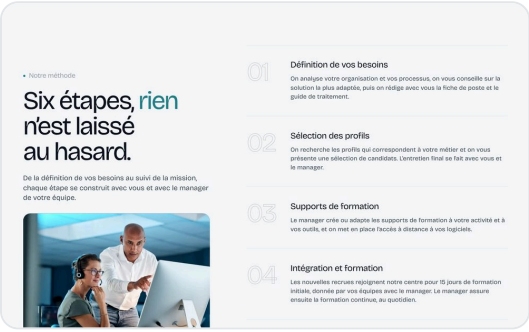

02 · WHY IT WORKS, CONTINUED

05 Real case studies, one structure

Three cases: roadside assistance (calls answered from 45% to 92%), home appliances (service quality from 82% to 95%) and software (+15% of clients signed each month). Each is told the same way: need, team, change, figures. Clients are not named.

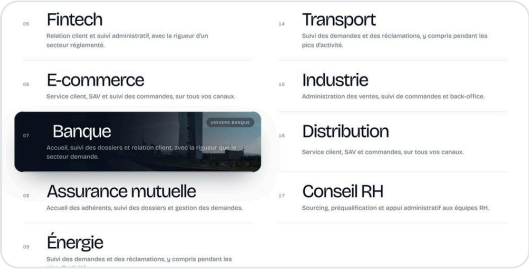

Why it works. A fixed structure makes cases quick to read and to compare. The results are SPM's own, which weighs more than any claim.

06 A method you can see

Six steps from defining needs to follow-up, and a live dashboard on which the client follows the team's figures in real time. An audit is offered to companies still deciding whether to outsource.

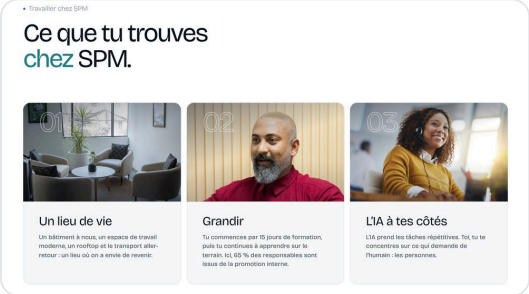

Why it works. 95% of SPM's clients had never outsourced before. Showing exactly what happens, and how results stay visible, lowers the perceived risk of a first outsourcing.

07 Seventeen sectors, easy to scan

Sectors are listed in two columns. On desktop, hovering a sector opens a photo inside its own row, on the empty side of the text, so nothing is ever covered. On mobile it is a clean list.

Why it works. Visitors look for their own sector first. Two columns keep a long list short, and the photo adds atmosphere without hiding the words.

08 A separate voice for talent

Careers speaks to candidates informally ("tu") with three promises: a place you want to come back to, growth through 15 days of training and 65% internal promotion, and AI taking the repetitive tasks. A spontaneous-application route is built in.

Why it works. SPM recruits as much as it sells. A distinct tone and real figures answer a different audience without diluting the client message.

03 FEATURES

What the site *includes*.

Eleven pages

- Home, Solutions, Why SPM, Clients & Partners, Sectors & case studies, News, Careers, Contact
- Legal notice, privacy policy and cookie page
- Seven service lines detailed on Solutions

Interactive elements

- Animated homepage hero
- Cost calculator using SPM's method
- Tabbed FAQ, expanding pillar cards, sector hover

Contact and conversion

- "Prendre rendez-vous" button always visible in the menu
- Contact form on the Contact page and a closing form on the main pages
- Click-to-call phone, e-mail link, three offices with map links

Trust

- Proof figures on the homepage, Clients, Why SPM and the closing block
- Three case studies with measured results
- ISO 27001 certification shown as in progress

Mobile and tablet

- Layouts designed for phone, tablet and desktop
- Menu becomes a drawer on mobile
- Checked at 390 px and 1,440 px widths

Privacy by design

- No cookies, no advertising or tracking scripts
- Nothing is stored in the visitor's browser
- No consent banner needed in this setup

Search and AI foundations

- Readable addresses (/solutions, /secteurs…) and one main heading per page
- Homepage structured data: Organization, Service and FAQ
- Descriptive text on every content image

Careers, news and language

- Spontaneous application by e-mail; area ready for job offers
- News layout ready, with one article card (article page to come)
- Site in French; an English version has not been decided yet

04 DESIGN

Built on *SPM's identity*.

The design follows SPM's brand book: "sure, clean and minimalist", with warmth in the people and sophistication in the intelligence. The site uses the brand palette, its text typeface and its photography rules.

COLOUR

Bleu Nuit
deepest dark, text
#0D141F

Bleu Ardoise
main dark
#1B2A38

Sarcelle
the one accent
#22808A

Bleu Acier
supporting
#43617A

Gris Perle
lines, neutrals
#DADDE0

Blanc brume
breathing room
#F9FAFB

TYPOGRAPHY

Bricolage Grotesque

The brand's text typeface, used across the site for clear, modern reading on screen. It is open-source (SIL Open Font License).

LOGO

SPM
HUMAN & AI

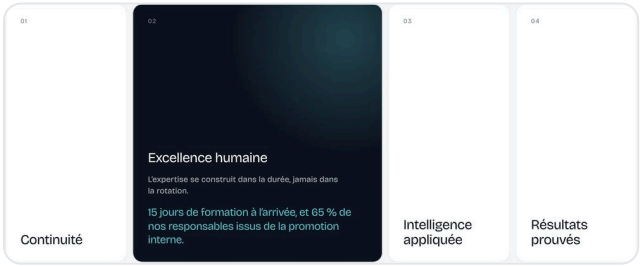

Navy version on light backgrounds and white version on dark ones, never altered, with clear space respected.

Layout

- Airy, with white space and thin lines
- Teal used as the single accent
- Rounded cards; dark panels only for emphasis
- Short sections, one idea each

Photography

- People who look natural, smiling and active
- SPM's own photo shoot wherever possible
- Real photography only; each image is used once
- No staged clichés or unrelated images

The palette, typeface and spacing in use: the pillar cards and the Clients page.

> The brand book pairs Libre Baskerville headlines with Bricolage Grotesque text. On the web, Bricolage Grotesque carries both for readability; the serif remains the voice of the logo.

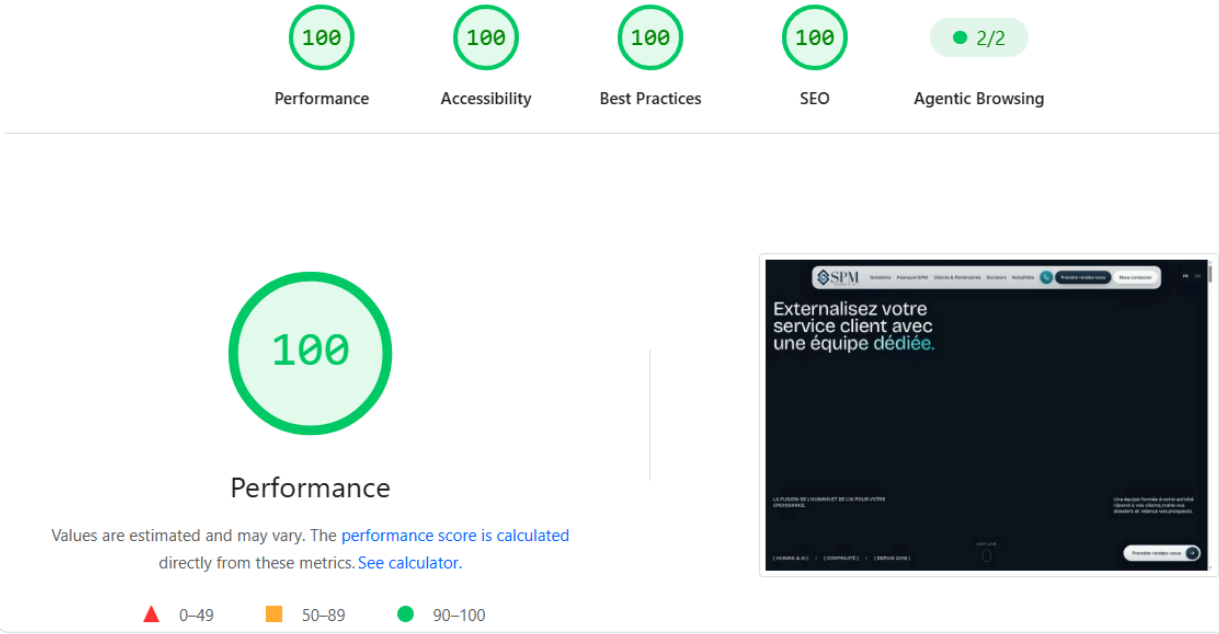

05 PERFORMANCE

Scores from *Google PageSpeed*.

Google PageSpeed Insights is the public tool Google provides to assess a page. It tests five areas and gives each a score from 0 to 100: **90–100 is good**, 50–89 needs work, below 50 is poor. The tests below were run on the homepage.

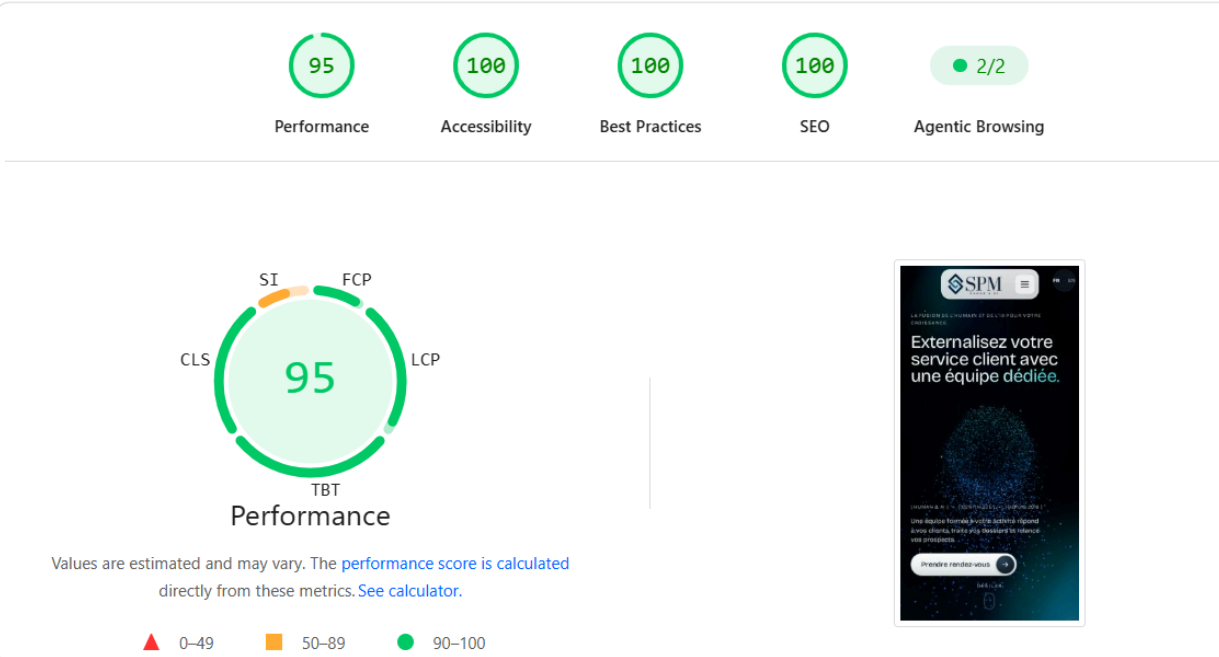

Desktop

Performance 100 · Accessibility 100 · Best Practices 100 · SEO 100 · Agentic Browsing 2/2

Mobile

Performance 95 · Accessibility 100 · Best Practices 100 · SEO 100 · Agentic Browsing 2/2

Screenshots of Google PageSpeed Insights results, mobile and desktop modes.

WHAT EACH SCORE MEANS

CATEGORY	DESKTOP · MOBILE	WHAT IT CHECKS	WHAT IT MEANS FOR SPM
Performance	100 95	How fast the page appears and becomes usable, measured on five timings.	Visitors see content straight away and stay. Speed is also part of how Google judges the experience of a page.
Accessibility	100 100	Whether everyone can use the page: readable contrast, labelled buttons and fields, keyboard use, text for images.	More people can use the site, including those with visual or motor difficulties, and it is easier for everyone.
Best Practices	100 100	Modern, secure, error-free code: secure connection, safe links, no browser errors.	A reliable site, free of the hidden faults that break pages later.
SEO	100 100	The technical basics search engines need: pages they can read, mobile-friendly layout, titles, working links.	The foundations are in place. Ranking itself then depends on content and authority, which is the purpose of ongoing SEO.
Agentic Browsing	2/2 2/2	A newer check: can automated, AI-driven browsers read and use the page (clear structure, labelled controls)?	The homepage can be read by the AI assistants and tools people increasingly use to research suppliers.

Why the scores are this high

- **Pre-built pages.** Each page is built in advance and delivered as it is; nothing is assembled when a visitor arrives.
- **Right-sized images.** Every photo is compressed, in a modern format (WebP) and served in several sizes, so a phone never downloads a desktop image. Images below the screen load only when needed.
- **Nothing third-party.** No advertising, tracking or social scripts, and the fonts come from the site itself, so the page never waits on an outside server.
- **A hero that doesn't block.** The animation runs separately from the page, so scrolling and clicking stay smooth.
- **Structure built in.** One main heading per page, labelled buttons and fields, descriptive image text and strong contrast.

Why mobile shows 95, not 100

Mobile tests simulate a mid-range phone on a slower connection, so scores are always lower than on desktop. 95 is still in the green band. The gauge shows one metric, Speed Index (how quickly the visible screen fills in), slightly short of the maximum. The animated hero is the richest element on that screen and the most likely reason.

How to read these scores

- They are estimates and can move a few points between runs.
- They were measured on the homepage; inner pages use the same building blocks.
- After launch, Google Search Console adds real-visitor data.
- Re-test after each major addition (chatbot, analytics, CRM scripts), as these can lower speed.

06 DELIVERY INFORMATION

What is *delivered*.

SITE MAP

PAGE	ADDRESS	WHAT IT CONTAINS
Home	/	Promise, three problems, calculator, approach, results, contact form, FAQ
Solutions	/solutions	Seven service lines in detail
Why SPM	/pourquoi-spm	Human & AI, promise, four pillars, six-step method, story and figures
Clients & Partners	/clients-partenaires	Proof figures, testimonials, certification, sectors
Sectors & case studies	/secteurs	Three case studies and seventeen sectors
News	/actualites	News list; one article card
Careers	/carrieres	What SPM offers, job offers area, spontaneous application
Contact	/contact	Contact form, three offices, phone and e-mail
Legal notice	/mentions-legales	Publisher, company details, terms of use
Privacy policy	/politique-de-confidentialite	Data collected, purposes, retention, rights
Cookie management	/gestion-des-cookies	What the site stores and how to control it

During review the site is available at **spm.3dweb.disruptivedodo.mu**. Two earlier design drafts (SPM V2 and V3) are also reachable there; they are not part of the final site.

CONTACT DETAILS PUBLISHED ON THE SITE

WHERE THE CONTENT COMES FROM

Figures, case studies, positioning	SPM's briefing e-mails and brand book
Calculator method	SPM's method (×1.5, +€1,000, +15%, 35 h / 40 h) and the 40% average saving
Company details (legal pages)	Official French company register (SPM France, SIREN 884 459 512, SAS, Dardilly) and the previous site (capital, publisher, hosting)
Texts	Written in French, in plain language, following the brand book's voice

IMAGES, FONTS AND CREDITS

SOURCE	USED ON	LICENCE / CREDIT
SPM's own photo shoot	Why SPM, Solutions, Careers	Belongs to SPM
Shutterstock	Solutions, Why SPM, Careers, Sectors, News	Licensed images
Pexels · Pixabay	Homepage, sectors, case studies	Free commercial licences, no credit required
OpenStreetMap	Contact maps	© OpenStreetMap contributors, credit shown on the page
Fonts	Bricolage Grotesque	Open-source, SIL Open Font License

TECHNICAL SUMMARY

- Pages are built in advance (static) and delivered over a secure connection (HTTPS).
- Language set to French; there is no language switch until an English version is decided.
- Photos are in WebP in several sizes; all pages checked on desktop (1,440 px) and mobile (390 px) widths in a current Chromium browser.
- No third-party calls on page load. Links to Google Maps and LinkedIn open only when clicked.
- A per-image photo-credit list is kept with the project files.

Privacy and cookies

The site sets no cookies. It stores nothing in the visitor's browser. Information typed into a form (contact, application) is not a cookie; it is covered by the privacy policy. It loads nothing from advertising or analytics providers, so no consent banner is required today. If analytics or a chatbot are added later, a consent banner and an update of the cookie and privacy pages become necessary.

Certification

The Clients & Partners page shows the ISO 27001 mark with the wording "Certification ISO 27001 en cours". The wording should be updated when the certification is obtained, and the mark must not be shown as obtained before then.

07 BEFORE GOING LIVE

What remains *to complete*.

The site is complete in design and content structure. The points below are the last steps between the review version and a confident launch.

TECHNICAL

- [ ] REQUIRED **Connect the contact forms.** Both forms (Contact page and the closing form on other pages) currently confirm to the visitor but do not yet send the message anywhere. They must be connected to SPM's inbox or CRM and tested end to end before launch.
- [ ] REQUIRED **Redirect the old addresses.** For example /service-client-sav/ to Solutions and /service-client-sav-2/ to Why SPM, so search rankings and old links are kept.
- [ ] REQUIRED **Complete the search information.** Write the page description and title for the ten inner pages (the homepage is complete), add a social-sharing image, and publish sitemap.xml and robots.txt, then submit the site to Google Search Console.
- [ ] REQUIRED **Unpublish the earlier design drafts** (SPM V2 and V3).
- [ ] REQUIRED **Final checks on the live address.** Every link, the phone and e-mail links, the forms and the mobile menu.
- [ ] RECOMMENDED **Analytics.** Optional, with a consent banner and updated privacy pages.

CONTENT TO CONFIRM WITH SPM

- [ ] REQUIRED **Testimonials.** The three quotes on Clients & Partners and the one on the homepage are illustrative wording that shows the layout; they are not statements by SPM clients. Replace them with real, approved quotes, or remove them, before launch.
- [ ] REQUIRED **Legal details.** Confirm the share capital (€10,000), the registration city (probably Lyon), the publication director, the hosting details, and whether data is ever handled outside the EU (the policy says no). Align the footer name "Service Plus Monde" with the legal name SPM France.
- [ ] REQUIRED **News article.** Supply the full text of "SPM ajoute HUMAN & AI à son nom" and its real publication date (the date shown is a placeholder).
- [ ] RECOMMENDED **Calculator.** SPM's own hourly rate or price per post would allow a precise comparison instead of the 40% average.
- [ ] RECOMMENDED **Job offers and applications address.** Applications currently go to contact@spmservices.fr.
- [ ] RECOMMENDED **Case studies.** Channels and start year for the home-appliance case; the roadside-assistance quote was approved for publication.
- [ ] RECOMMENDED **Photos and social pages.** More of SPM's own photography (a home-appliance showroom image would suit its case study) and any Facebook or Instagram pages to link.

08 WHAT COMES NEXT

Ready to *grow* with SPM.

The site is built so that new capabilities can be added without redesigning it. Three stand out for SPM.

01

CRM

Every enquiry from the site is sent straight into SPM's customer-relationship tool, with the page it came from, the need expressed and the company.

WHAT IT BRINGS

- No lost enquiries
- Automatic acknowledgement to the visitor
- Follow-up reminders for the sales team
- A view of the pipeline, from visit to signature

FIRST STEP

Connecting the contact forms, required before launch, is the natural first step.

02

AI chatbot

An assistant on the site that answers visitors' questions from SPM's approved content, qualifies the need, and books a call or hands over to a person.

WHAT IT BRINGS

- Answers around the clock, across time zones
- Qualified leads sent to the CRM
- A live demonstration of SPM's own message: AI handles the first answer, people handle what matters

TO PLAN

An approved knowledge base, a human hand-over, and an update of the privacy and cookie pages.

03

Ongoing SEO

A monthly programme that turns the technical foundations into visibility on Google and in AI answers such as ChatGPT or Gemini.

WHAT IT INCLUDES

- Keyword and competitor research
- New articles and case-study pages every month
- Local presence for the three offices (Google Business Profile)
- Technical monitoring with Search Console
- A monthly report with visits, rankings and enquiries

OTHER OPTIONS

English version — not decided yet; if wanted, it means translating every page and adding a language switch back.

Recruitment pages — one page per job offer, with an application form linked to the CRM.

Analytics and conversion tracking — with a consent banner, to measure what brings enquiries.

Case-study and article pages — each card opens a full page, which also feeds SEO.

Online booking — visitors choose a slot directly in a sales calendar.

Newsletter — keep clients and candidates informed.

Thank you for your trust. We are happy to walk through this report together.
